Sprouting Seeds is an annex of Elevate Holdings Limited that was founded in 2015. Located along Salaama Road, Kampala, we stock nearly 100 species of ornamental trees & shrubs as well as exotic palms & flowering trees.

Our goal is to not only produce these fine selections in commercial quantities but to do so with long term performance & quality in mind, enabling us deliver the very best product. Our trees not only look good on the outside, they are also structurally sound where you can’t see.

Service: After purchase, our experienced crew will load your trees to assure proper nesting & minimal breakage during transportation.

Variety: From exotic palms to flowering trees, we are constantly adding superior species & varieties to our available palette.

Acacia

UGX 20,000

Beautiful shrub that flowers yellow. No definite shape. Great for feature gardens.
Agapanthus are perennials with fleshy, rhizomatous rootstocks originating from Southern Africa. Both deciduous and evergreen, some have thick, strappy leaves and others grass-like foliage. They range from fully hardy to half hardy, with the evergreen varieties generally the most tender. The evergreen species originate mainly from areas with winter or year-round rainfall, such as the East or West Cape. Deciduous species grow mainly in areas with dry winters and moist summers.

Alexandria Palm

Beautiful shrub that flowers yellow. No definite shape. Great for feature gardens.
Alkelia

Also known as monkey puzzle, Araucaria Araucana is an evergreen tree growing to 1–1.5m in diameter and 30–40m in height. It is native to central and southern Chile and western Argentina. Araucaria Araucana is the hardest species in the conifer genus Araucaria.

Allamanda

An easy-to-grow flowering shrub from the tropics that offers a steady display of golden-yellow flowers all spring and summer long. It's prized for its excellent heat tolerance and long-season bloom -- as well as the fact that allamanda grows well in both containers and landscapes.
Amelia

Summer shrub that flowers orange. Very fragrant.

Ashok

The Ashok tree is cultivated to resemble the growth pattern of erect pillar-like Mediterranean cypress trees. It is a popular park and garden plant, much used in landscaping on the Indian subcontinent.
Axoya

A rich green leafy shrub characterized by red, yellow, light orange or white ball shaped flowers.

Bottle Brush (White)

Unique ornamental tree characterized by light green/silver leaves all year round. Grows up to 8m tall
**Bottle Brush (Yellow)**

Unique ornamental tree characterized by bright yellow leaves all year round. Grows up to 8m tall.

**Bottle Palm**

Hyophorbe Lagenicaulis has a single trunk, about 2ft in diameter with ring scars and green crownshaft at the top. The gray, self-cleaning trunk is bottle shaped, hence the name Bottle Palm. The Bottle Palm has a small crown of 4-6 4 to 8 pinnate, or feather-like, leaves that can grow up to 10ft.
Sprouting Seeds nursery

Coccoloba Shrub

Coccoloba Uvifera is a species of flowering plant in the buckwheat family, Polygonaceae, that is native to coastal beaches.
The Coconut palm is a palm tree in the family Arecaceae (palm family). It is a large palm, growing to 30 m tall. It has leaves that are 4–6 m long. The term coconut can refer to the whole coconut palm or the seed, or the fruit, which, botanically, is a drupe, not a nut.

Colombion

Hardy shrub that can be trimmed to any shape/form. Grows up to 1.5m high. Characterized by green leaves with white edges.
**Colton Shrub**

Unique shrub that may come in yellow or multiple colored. Usually look great in a cluster.

**Cycad Palm**

A popular houseplant known for its feathery foliage and ease of care they prefer to be situated in well-drained soil, and like other cycad plants, they do not respond well to overwatering.
Eugenia is a glossy leaved shrub or tree, which is often used as a hedge or privacy barrier. It makes an excellent potted plant or you can prune it severely and use it as a low border in formal garden settings.

Ficas

It is a medium-sized tree which grows to a height of 24–27 metres (79–89 ft) usually and up to 32 metres (105 ft) tall in wetter areas. It is a fig tree belonging to the group of trees known as strangler figs, which is because its seeds can germinate on other trees and grow to strangle and eventually kill the host tree. Stock available in off white.
**Fishtail Palm**

Also known as Caryota is a genus of palm trees. They are often known as fishtail palms because of the shape of their leaves.

**Foxtail Palm**

The enchanting foxtail palm is extremely popular for its perfect proportions, self-cleaning habit and full, rounded fronds. A tropical showstopper in the landscape, the foxtail is available in single or multi-trunk specimens. Its smooth gray trunk is topped with a bright green crownshaft and big tufted fronds that resemble the bushy tail of a fox. The charismatic beauty of this palm works in almost any landscaping, as long as the house itself isn’t overwhelmed by its size.
Frangi Pani

Frangipanis thrive with little maintenance, are easy to strike from cuttings & look pretty in float bowls all summer long. Frangipanis are the perfect Christmas decoration - tie flowers on to the tree with ribbons, scatter them over the table, or attach flowers to gifts. They suit any style of garden where one can throw down a rug below its boughs for a lazy day in the shade.

Fubia

Perennial shrub up to 3m high, milky latex produced when stems or branches broken, branches are smooth, slender, and green. Flowers pink.
Gardenia shrubs are prized by gardeners for their highly fragrant flowers and bright, glossy, evergreen foliage that's attractive year-round.

Golden Cane Palm are a clumping palm that is good for screening. Yellow stems are normal - it's why it sometimes goes by the name of "Golden Cane".
**Gruveria**  
Hard wood tree that doubles as an excellent ornamental piece to have featured in any garden. Grows up to 10m high and 4m wide. Great for wide driveways and boundary areas.

**Layer Green**  
Green shrub that can grow up to 2/3m high. Excellent for hedges, pots as well as feature gardens.
Layer Purple

Purple shrub that can grow up to 2/3m high. Excellent for hedges, pots as well as feature gardens.

Legastromea Shrub

Grows 3m high. Characterized by pink flowers. Great for hedges and feature gardens.
Lipstick Palm

 Ugx 1,000,000

Also known as Red palm or Red sealing wax palm, Lipstick palm (Cyrtostachys Renda) is appropriately named for its distinctive, bright red fronds and trunk.
Mussaenda

Commonly known as Ashanti blood, red flag bush and tropical dogwood, is an evergreen West African shrub.

Petreas

A climber and creeper. A showy creeper once it gets going, but it needs strong support and assistance with climbing. A shrubby looking plant with large, rough leaves, it gets covered in 200mm-long sprays of small starlike purple flowers from spring to summer.
Philodendron is a large genus of flowering plants in the Araceae family. Many are grown as ornamental and indoor plants. They are characterized by heart-shaped glossy leaves.

Phoenix Palm

Large palm to 18 m tall with single, thick, non-branching trunk (1.2 m diameter) with a diamond-shaped pattern from old leaf scars and large crown of foliage at the top of the trunk. Long, stiff leaves (to 1.8 m) are made up of many leaflets that are dark green, lance-shaped and pointed (30 - 45 cm long), and the leaf stalk is covered with sharp, shiny green spines (5-8 cm) with a feathery appearance.
**Pinanga**

Small, clustered, undergrowth palm. Stems erect, unbranched, 2-8 (10) m tall, 1.5-7 (10) cm in diameter, with internodes 4.5-12 (20) cm, scars 0.5-1.2 cm; stem surface green to brownish green.

---

**Pony Tail Palm**

It earned the name “elephant’s foot” due to its bulbous base, thrown in the thin trunk and some call it a “bottle palm”. Its large base and head of pendulous, smooth-edged flat leaves, makes the “Pony tail plant” unique.
Podocarpus are evergreen shrubs or trees, usually from 1 to 25 meters tall, known to reach 40 meters at times.

The tree has broad, thin leaves, smooth bark and bears clusters of green sweet-smelling flowers that mature into sticky barbed seeds.
**Primumialis**

The Pyramidalis Arborvitae, Thuja Occidentalis, is a tall, slender and compact grower; is an evergreen tree in the cypress plant family.

---

**Royal Palm**

The Royal Palm tree will give your yard that "little slice of paradise" feeling. It is one of the most prestigious looking and recognizable of all palms.
**Spider**

Green ball shaped shrub with green and white coloured leaves great for pathways and other garden border line demarcations.

---

**Tabebwa**

A rather large deciduous tree, with trunks sometimes reaching 8 dm width and 30 m height. Usually a third of that height is trunk, and two thirds are its longer branches. It has a large, globous, but often sparse canopy characterized by bright pink flowers. The tree has a slow growth rate.
**Thuya**

The "Green Giant" Thuja is a large fast growing evergreen that has been known to grow up to 3 feet a year. Its natural pyramid form makes an exceptional landscape tree. They can be used for a screen, hedge, windbreak or a single specimen. Green Giant Thuja can grow up to 50-60 feet high & have a 12-20 feet spread. They prefer moist, well drained soil, sun to partial shade, Zone 5-7.

**Triangle Palm**

(Dypsis Decaryi) is one of the more attractive palm species. It is characterized by its meticulously arranged fronds that form the shape of a triangle. What makes the Triangle Palm so conducive to first time palm planters is that it grows extremely well whether indoors or outdoors. Because of its beautiful and unusual shape, they are a favorite to plant for enthusiasts and hobbyists.
